# Registration

Overview

The User Registration process in PAMS is a two-step process:

- Register to PAMS
- Register to Institution

Registering to PAMS ensures that you have authorized access to PAMS, whereas registering to an institution ensures that you are associated to an institution. Based on your role, you will be able to manage institutions and/or users within the institution. Once you have registered to PAMS, you will be able to view/update your profile as well.
